

# Software Developer – AI Career Roadmap

Average Skill Score: 5.0 / 10

Recommended Duration: 6 Months

## Skill Overview

Programming Fundamentals: 5/10

Data Structures & Algorithms: 5/10

Object-Oriented Programming: 5/10

Version Control (Git): 5/10

Databases: 5/10

Operating Systems: 5/10

Computer Networks: 5/10

Problem Solving: 5/10

Debugging: 5/10

Testing Basics: 5/10

## 6 Months

### Courses:

- Advanced DSA
- Web Development

### Certifications:

- Meta Backend Developer

### Projects:

- Full Stack Application

### Internships:

- Software Development Internship

# Final AI Career Verdict

## Verdict Level: Foundation Required

You are currently assessed as **\*\*Foundation Required\*\*** for a career as a Software Developer. Your overall readiness is **Foundation Required**.

### ### Key Strengths

- Programming Fundamentals
- Data Structures & Algorithms

### ### Areas to Improve

- Debugging
- Testing Basics

### ### Final Recommendation

You should continue focusing on fundamentals and structured learning. Once core skills improve, revisit advanced topics and challenges.
